SHOTS FIRED AT CLERK CAUSE A MARRIAGE

A Montenegrin, clerking in a countryman's store in Rock Springs, Wyo., fell in love with a pretty Austrian girl and was paying her close attention when the father of the girl took two shots at the objectionable lover. Thereupon the fellow and his girl decided to elope and, taking the corner of the store into their confidence, induced him to accompany them to Ogden.

Arriving here, the young people paid a stranger \$1 to point out where and how they could get married. The guide led them to the City Hall, where the junior halted them with the information that they had arrived too late. By 9 o'clock at night they had searched out a minister and were married. A little later a message arrived from the sheriff of Sweetwater county, Wyoming, inquiring after the elopers, but when Sheriff DeVine got trace of the couple, the ceremony that took the matter out of his hands had been performed.

The Montenegrin and his Austrian bride have started back to Rock Springs, resolved to subdue the irate father.

DRY FARMING ON PROMONTORY POINT

The Promontory Point company, in which Judge H. H. Henderson and ex-Mayor Robert C. Lindley are interested quite extensively, is breaking up a large tract of dry farm land near Saline, on Promontory Point, on the Ogden-Lucan cutoff, a number of plow teams having been at work there since last January. Next year it is expected that the lands will produce wheat and other dry-farm products.

More than three hundred acres have been cleared of brush this year, ready to be seeded this fall.

The land is rich alluvial soil and is covered with a heavy growth of sagebrush which makes it the best of dry farm lands. The lands lie on the western slope of the Promontory mountain range, bordering the Great Salt Lake and along the proposed Saline-Burley railway. Fresh water has been found at a depth of about 130 feet in such quantities as to warrant the installation of a pumping plant and Judge Henderson is of the opinion that sufficient water can be pumped to the surface to irrigate a large tract of fruit land.

SPARROW WILL KILL WEEVIL

Madison, Wis., Aug. 23.—A new use for the despised English sparrow has been found by T. H. Parks of the Idaho Agricultural college and James G. Sanders of the University of Wisconsin.

These two scientists, working together against a pest known as the alfalfa weevil, it was learned here today, have demonstrated that the pest is not spread through the seed of alfalfa, as the weevil feeds on the leaves and stem of the plant but not on the seed. It thus becomes a natural food of the sparrow.

The weevil is of foreign birth but since its importation has done great damage and at one time threatened the whole industry in Utah, Idaho and southern Wyoming. It caused great alarm among growers of the middle west also.

KILLS HUSBAND AND CHILDREN

Dubuque, Ia., Aug. 23.—It was positively declared today that the body found in the burned barn at the Sternwells home, where the family of five perished, was that of Mrs. Sternwells. This was determined when gold and other false teeth were discovered in the ashes of the ruins. The authorities take this as proof that Mrs. Sternwells murdered her husband and the three children, burned the farm buildings and then committed suicide. The funeral for the five dead was held today.

Question of which died first, husband, wife or children, may determine the disposition of the estate, which is now believed to be worth fully \$100,000.
